Project Name	Cloud Application Development
Maximum Marks	2 Marks

PROBLEM STATEMENT:

Ram is a student who practices reading the newspaper daily. The newspaper he reads although has much information is limited to the information that is displayed in the newspaper. Ram needs a way to read daily trending news and desired topics of news from anywhere any time. Something which should fit in the palm of his hands, which he could carry everywhere, access from everywhere, something digital such as an Application hosted on the internet which could be accessed from any device that is connected to the Internet. Such as smartphones and computers.

Who does the Problem affect?	Users such as Ram
What are the Boundaries of the Problem	Geographic , workflow, daily life
What is the Issue?	Physical newspapers are old fashioned in this digital era. They cost money to

	buy, can easily be damaged, limited amount of information, not flexible to modifications, poor quality
When does the Issue Occur?	The issue occurs when the customer wants to read the news.
Where does the Issue Occur?	The issue occurs when people try to access information i.e during the usage. Accessing information is flawed through the usage of physical newspapers in the digital era.
Why is it Important that we fix the Problem?	It is important to fix this problem because since everything in our day to day life is becoming/being converted to digital from a physical/analog entity. It is necessary to access information from anywhere. It reduces the hassles of getting knowledge and information that has happened before and will promote everyone to know better about the current events that's happening and will motivate everyone to gain a profound knowledge in the field of their interests. It wouldn't look weird when
